Appl. No. 10/563,059  
October 14, 2008

**AMENDMENTS TO THE ABSTRACT:**

Please delete the abstract and insert the attached substitute ABSTRACT after the claims.

## ABSTRACT OF THE DISCLOSURE

A data set to be compressed has a markup hierarchy that includes data parts having a first binary size and is arranged according to a definition part. The markup hierarchy defining the data parts in the definition part is assigned with codes which have a second binary size smaller than the first binary size. The data parts in the data set are replaced by the assigned codes to produce a compressed data set.
